Enhanced Efficiency.**

# VSee

## Telehealth Benefits

- See More Patients
- Improved access to care delivery
- Improved healthcare quality
- More Intelligent Solution
- Increase Revenue

## VSee Messenger Pro

Vsee Messenger is the easiest and most efficient way to develop a Telehealth program. It is easier to use for you and your patient. You should download onto your smart phone, iPad, laptop and desktop.

**You can start the VSee telehealth service.  
\$49 / month / provider!**

# VSee Clinic & Hospitals

## Telehealth for Healthcare Professionals & Hospitals.

Our system makes the connection easier and the scheduling a breeze. Your doctors in a clinic or a hospital department can quickly create a telehealth platform that is white labeled with your brand. The opportunity to deliver healthcare in a more efficient manner is best for everyone. It creates convenience for the patient and satisfaction for the provider. Specifically designed for the healthcare user — simple, secure video, text chat, document-sharing, peripheral streaming, & more! You can communicate with your home healthcare provider, patient, colleague and deliver healthcare more efficiently.

### The Telehealth Experience for a Patient is Great.

Create your clinic to give patients experience you want.

## Trusted By 1000+ Telemedicine Companies

### Features Including

Scheduling, short EMR, billing and more. It is aimed for efficiently creating a telehealth program for medical groups, clinics, hospitals and departments.
